HOW TO USE THIS INDEX

Author Index

This Author Index is in alphabetical order, and includes exact titles of the works as printed in the journal. Note that the particular author identification in the Geographic and Subject Indexes can thereby be readily converted to precise bibliographic citations. Where the article has been reprinted from another source, the original source is identified.

In a few instances, the author's work has been cited in the Author Index but the article itself has not been considered worth citation in any other section (e.g. general address, personal opinion, non-philatelic content etc.). Where the compiler has felt it to be appropriate, letters to the editor have been indexed in the Author Index as well as in other applicable indexes.

Citations

Citations consist of volume number (Arabic numerals) and issue number, separated from the inclusive pages by a colon. It is important to note that until 1968 issue 1 of each volume was October, and not January. Official Circulars are designated by the abbreviation "Circ" followed by a number (for the First Series, No. 1-5, 1886) or date (for the Second Series, 1893-95). The American Philatelist and Year Book of the American Philatelic Society (Association) is designated by the volume number and the abbreviation "YB"; supplements and sections are shown as "Supp" and "Sec" respectively. Thus,

Circ 1:1 cites Official Circular No. 1 (Nov 1886), page 1.

Circ Apr 95:1 cites Official Circular, April 1895, page 1.

Advertising pages were not numbered in the first seven volumes; where indexed, they have been cited by lower-case Roman numerals in parentheses, e.g., "(iii-iv)." There were numerous instances of mispagination throughout the history of the AP. When these mistakes were not subsequently corrected, the page numbers have been cited as printed, in parentheses.

In those instances where the pagination was later revised, and/or use of the original (incorrect) numbers could prove misleading, the correction has been cited followed by the numbers as initially printed, in parentheses, thus: "28/1:2(286)." It is assumed that most users of the index will want the number as it appears on the page they are looking up, which is why the incorrect number is provided; at the same time, earlier annual and cumulative AP indexes have already adopted the corrected numbers, so the dual listing is given as a caution flag.
INDEX TO AMERICAN PHILATELIST (VOL. 1-100)
